

# PROTEUS<sup>®</sup> 2000

EXPANSION SOUND ROM

## WORLD EXPEDITION

**E-MU**

E-MU PN FI10573 Rev. A

© 2000 E-MU Systems, Inc.

## **Presets**

---

### **World Expedition ROM**

The World Expedition sound set consists primarily of ethnic instruments and percussion collected from the far corners of the planet. This expertly sampled collection will take your music to places it's never been before.

### **Front Panel Knob Functions**

The front panel knob functions are standardized for most of the factory presets. The typical connections of the controller knobs when using WORLD presets are listed on the following page. Match the MIDI controller numbers corresponding to the knobs on your MIDI keyboard to the realtime controller assignments in the Master menu to control these important functions.

Remember that the front panel knobs can be reprogrammed for each preset and stored in any user preset location.

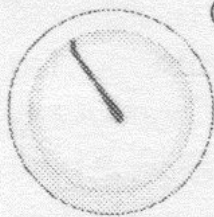

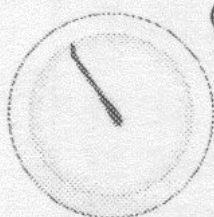

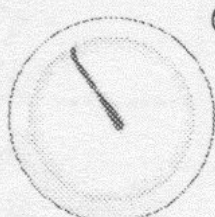

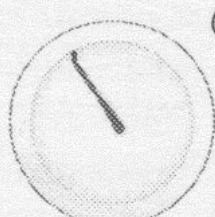

### **Important Note:**

The "Modules Upgrade CD" included with this sound set contains new software which adds some great new features including, SuperBEATS and the Rhythmic Pattern Generator/Arpeggiator. Just insert the Upgrade CD into your Mac or PC and follow the simple instructions to get this new release.

If you have a 128 voice Proteus (*P2K or V2K*) use: **p2k121.dli**

For a 64 voice Proteus (*B-3*) use: **p1k121.dli**
